23. Aims of programme

- To offer a high quality course incorporating extensive research experience, in which students are challenged by, and stimulated to challenge, accepted wisdom in all fields of biological science;
- To prepare graduates for a PhD or careers in academic and commercial research, and in a range of graduate careers that involve the management and welfare of companion, farm, laboratory, working and wild animals.

24. Overall Programme Level Learning Outcomes - the programme offers opportunities for students to achieve and demonstrate the following learning outcomes. Learning outcomes should be specified for all intermediate awards as well as for the terminal award.

E.g. On successful completion of the Bachelor of Science course, students will:	Modules in which each learning outcome will be developed and assessed:
<ul style="list-style-type: none"> • Have a detailed understanding of cell biology, physiology, and genetics 	Year 1 modules
<ul style="list-style-type: none"> • Have a detailed understanding of the basis of infectious & non-communicable diseases and the broader applications for disease control 	Year 2 modules
<ul style="list-style-type: none"> • Display practical skills including the ability to design and execute experiments, analyse and interpret the resultant data, and present conclusions in a variety of formats. 	Year 2 Research Project
<ul style="list-style-type: none"> • Be able to scientifically measure, explain, and evaluate animal behaviour and welfare 	Y1-3: Projects; Y2: Introduction to Animal Behaviour, Welfare and Ethics; Y3: Science of Animal Welfare; Animal Behaviour and Cognition; Applied Animal Welfare
<ul style="list-style-type: none"> • Be able to debate and analyse the political, social, legal and economic context of animal welfare 	Y1-3: Projects; Y2: Introduction to Animal Behaviour, Welfare and Ethics; Y3: Applied Animal Welfare; Animals and Human Society
<ul style="list-style-type: none"> • Have developed the ability to access appropriate information, make methodical observations on the normal and abnormal functioning of biological systems, discriminate between important and relatively unimportant information and observations, reflect on information and observations, and solve problems, and discuss uncertainty in relation to scientific "facts", and balance different schools of thought. 	Y3 Project

<ul style="list-style-type: none"> Have an appreciation of health and safety appropriate to laboratory and field work, including completion and understanding of risk assessment and COSHH documents. 	Investigative Projects (all years)			
25. Teaching/learning methods	Approximate total number of hours			
Lectures	8-10 hours per week			
Practical / Directed Learning sessions	8-10 hours per week			
Tutorials & self-directed Learning	5 hours per week			
26. Assessment methods	Percentage of total assessment load			
Coursework	22%			
Written Exams	45%			
Projects	33%			
27. Feedback				
<p>In each module in each year, there are a number of formative feedback opportunities. These include written formative feedback on individual coursework, online quizzes with answers, group question and answer sessions, feedback to the year group about exam and ICA performance, feedback to individual students about exam and ICA performance (in one-to-one tutorials). Students are encouraged to seek feedback from lecturers and tutors as needed during all small group learning and practical classes. Frequent opportunities for formative feedback (oral and written) during investigative projects.</p>				
28. Programme structures and requirements, levels, modules, credits and awards				
<p>NB: The College will not deliver any module or part of a programme if circumstances have changed to threaten its quality or viability. Such offerings could change after a student has started the course. However, the College will always offer alternatives that will be of equal cost in both fees and add-on expenses to the student and of equal academic value.</p>
