23. Aims of programme	
<u>BSc Biological Sciences</u> <ul style="list-style-type: none"> To offer a high quality course, in which students are challenged by, and stimulated to challenge, accepted wisdom in all fields of biological and biomedical science. To prepare graduates for careers in academic and industrial research, biotechnology and the pharmaceutical industry in general, and in other health and medicine-related industries. To offer a high quality preparation for students aspiring to graduate entry to Medicine, Dentistry or Veterinary Medicine. <p><u>Placement Year</u></p> <ul style="list-style-type: none"> To prepare students for the workplace through development of employability skills and understanding of the sector and organisation in which they are placed To increase student employability by providing work and research experience with a placement provider To provide students with a framework for lifelong learning To provide opportunity to develop research skills, including synthesis of information, critical analysis and an appreciation of factors that contribute to uncertainties <p><u>MSci Biological Sciences</u> The specific aims of the MSci Year are to enable students to:</p>	

- Gain research experience within biological and biomedical sciences that is relevant to their degree.
- Gain a deep and systematic understanding of current questions, problems and methods employed within the selected specialised research topic.
- Implement principles of project and experimental design and carefully execute, record and clearly disseminate research.
- Use self-reflection to improve levels of knowledge, professionalism, personal skills and research skills.
- Develop a sound appreciation of the research environment in which the student is working and their role within it.
