

Border Terriers

HEALTH STUDY RESULTS

Dogs in study

2,841

Average lifespan

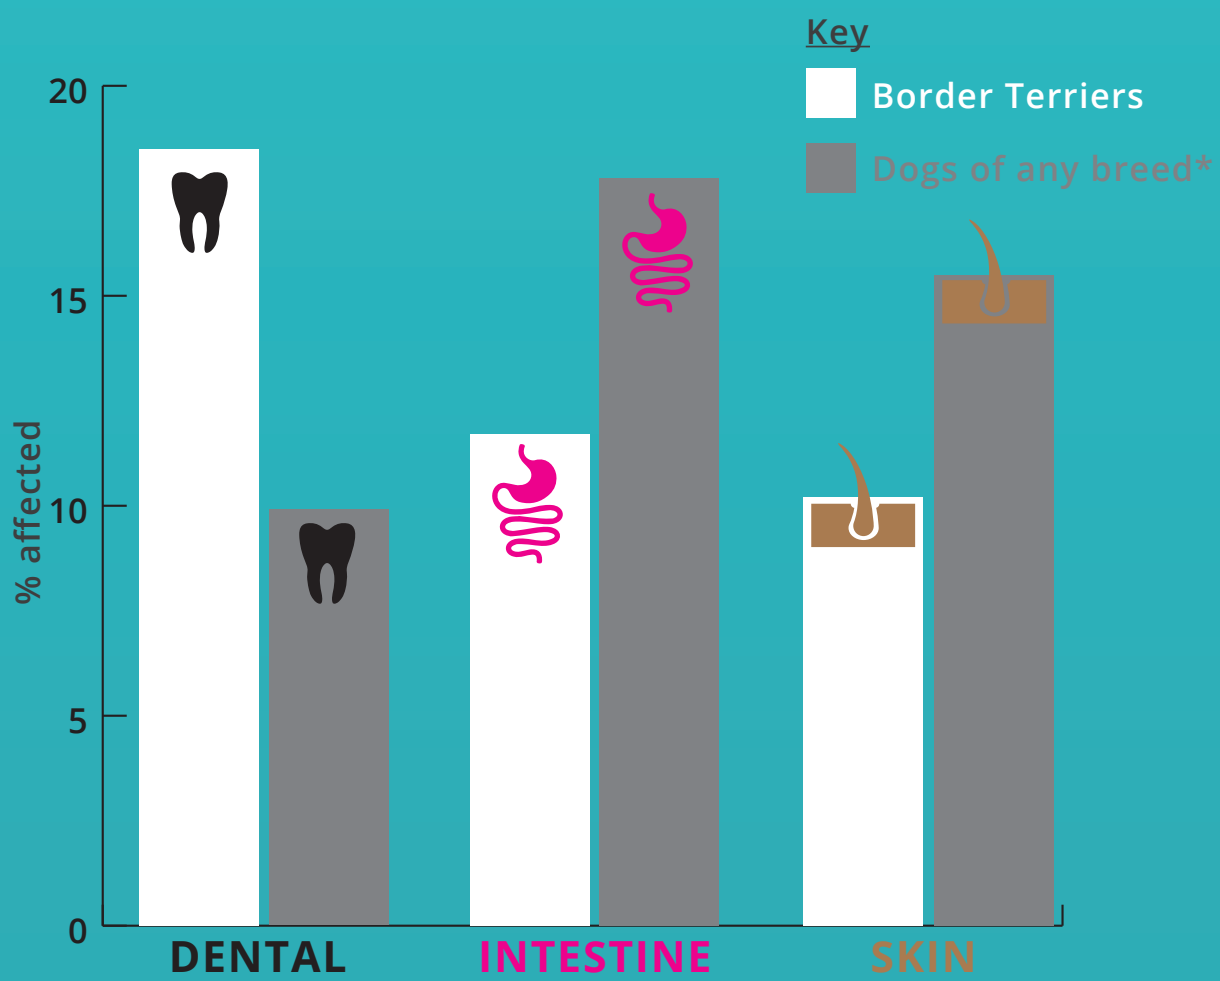

12.7 years

Average adult bodyweight

Males - 10.9kg
Females - 9.1kg

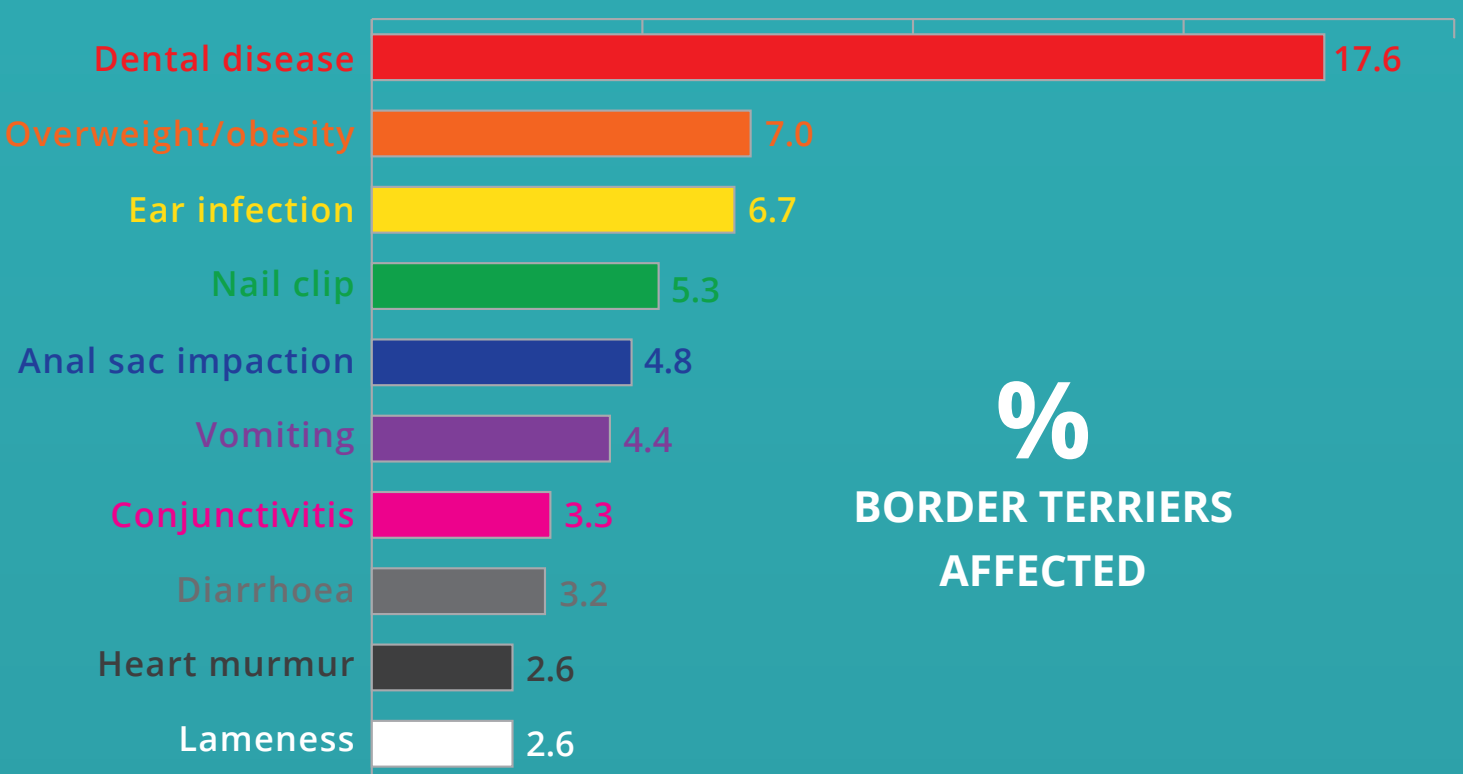

Most Common Disorder Groups

* Taken from: O'Neill et al (2014) "Prevalence of Disorders Recorded in Dogs Attending Primary-Care Veterinary Practices in England" PLOS ONE.

Most Common Specific Disorders

CONCLUSIONS:

Border Terriers are a relatively long-lived breed

Dental problems are especially common in Border Terriers

Owners should carefully consider the diet and dental care of their Border Terrier to prevent and resolve dental issues which can cause pain and infection
